

VarioTip Premium - Ureteral Catheter

Consisting of: ureteral catheter, guide-wire and connector.

VarioTip Premium, the x-ray visible diagnostic instrument, guarantees the urologist excellent steerability and torqueability to facilitate the ostium passage and easy manipulation in the ureter.

The ureteral catheter with braided shaft is made of nylon. The 30° angled, soft catheter tip features an extremely visible radiopaque tip made of tungsten.

Vario Tip Premium, straight, open
